GREENWING
TECHNOLOGY, Inc.

YOUR EPROCUREMENT CAN BE SIMPLIFIED WITH AUTOMATION.

Punchout catalogs and eProcurement integrations can be confusing, especially if this is your first customer integration. From adding punchout extensions to your VAI S2K eBusiness store to integrating with your VAI S2K Enterprise system, these can be daunting tasks without the right team in place. Greenwing Technology brings 15+ years of punchout expertise to help you build stronger relationships with your customers through advanced automation.

What is a Punchout Catalog?

A punchout catalog is an eCommerce website that allows an institutional buyer to buy from a supplier directly from their procurement system. Institutional buyers such as universities, corporations and hospitals purchase procurement software to control their financial spending. By allowing their buyers to connect to their procurement applications via Punchout Catalogs they allow the individual buyers to place requests for items, but put the approval process with management.

What are The Benefits of Punchout and eProcurement Integrations?

- Simplify the eProcurement process with punchout by creating a dynamic user shopping experience.

- eProcurement automation eliminates manual keying errors by automatically importing POs and exporting invoices via the VAI S2K eBusiness system and VAI S2K Enterprise platform.

- Reach new customers and win bids by meeting RFP or municipal contract requirements.
