

## Ad Hoc & Custom Do-It-Yourself Query & Analytics for VAI S2K Users

**NGS-IQ** can cost-effectively satisfy user needs by overcoming the limitations of IBM Query/400 without the cost, complexity, and ongoing consulting associated with IBM Cognos and DB2 Web Query.

Enjoy point-click and drag-drop query development with output to:

- Microsoft Office (Excel, Word, and Access)
- Web browsers
- portable OLAP cubes
- PDF, HTML, XML, TXT, CSV, Db2, print

Web integration and email features are built in to simplify secure access and report distribution.

**NGS-IQ** also extends data access to mobile device users without sacrificing the performance and security of IBM i and Db2.

**If you like the thought of being self-sufficient and in control of your VAI S2K reporting and analytics, please talk to us and consider joining the growing community of VAI S2K customers who use NGS-IQ.**

### **Comments from NGS-IQ Customers**

*“Faster report generation for seven department managers means they can quickly respond to changing market conditions. Qport Access provides an easy-to-use reporting solution with direct links to Excel spreadsheets.”*

*“Query development is easier and more efficient, as we are working with information directly on IBM i. Our reporting process shrunk from three days to five minutes, and on-the-fly report requests can be handled within 15 minutes.”*

*“NGS-IQ’s functionality significantly reduces IT hours in query development, enabling IT to focus on priority projects. Run-time record selection gives users the flexibility to quickly get data as needed for their reports without additional IT involvement.”*
